

How to add a contact on Skype

To add a contact on Skype you need to start with clicking the contacts button on the top on the Skype window. Then click add contact from the box that opens up.

Then fill in the information to add. And wait for a name to pop up. Then if you see the name then press the +Add button. If you don't see the correct name then see if you typed in something wrong.

If you entered the info correctly and pressed add then you will see the contact on the list. You can't do anything with him unless he/she accepts the request.
